Projects

Factor (React Native / Python)

- Mobile app built with React Native for iOS and Android
- REST API built using Django and PostgreSQL, deployed on Amazon Web Services with registered domain
- Had the idea, designed and developed the architecture of the application from scratch
- Made Unit Tests and CI/CD pipeline to test and deploy the server
- [Git Repository](#)

Portfolio Website (React)

- Developed the website using Next.js and Tailwind, leveraging the power of React and quickly building user interface
- Usage of Git good practices to learn how to work in a team environment
- Documentation of my projects with blog posts to allow me to better communicate my work and thought process to teammates.
- [Git Repository](#)
